Fifth Printing (Second Edition) . . . . . April, 2014

Published by Asoke K. Ghosh, PHI Learning Private Limited, Rimjhim House, 111, Patparganj Industrial Estate, Delhi-110092, and Printed by Rajkamal Electric Press, Plot No. 2, Phase IV, HSIDC, Kundli-131028, Sonepat, Haryana.

To
my wife SUMITA
for her limitless encouragement in
my quest for academic excellence

CONTENTS

Preface ..... *xv*
Preface to the First Edition ..... *xvii*

CHAPTER 1 Introduction **1–11**

1.1 Historical Development of Power Systems 1
1.2 Functional Requirements of a Power System 2
1.3 Sources of Energy for Generation of Electricity 3
1.4 Electric Energy Consumption 4
1.5 Power System Structure 4
1.6 Electrical Load 8
1.7 Interconnection 8
1.8 Operational Challenges of Interconnected System 10
1.9 Abnormal Situations 10
1.10 About this Book 11

CHAPTER 2 Fundamental Concepts of AC Circuits **12–28**

2.1 Sinusoidal AC Quantities 13
2.1.1 Phasor Representation 14
2.1.2 Reactance 16
2.2 Power in AC Circuits 17
2.3 Three-phase Circuits 19
2.4 Transients in Electrical Circuits 20
2.5 Per Unit Representations of Electrical Quantities 24
2.5.1 Base Values 25
Review Questions 27

PART I ELECTRIC POWER TRANSMISSION AND DISTRIBUTION

CHAPTER 3 General Considerations of Transmission and Distribution **31–43**

3.1 Some Preliminary Issues 31
3.1.1 Choice of Frequency 33
3.1.2 Choice of Voltage 33
3.1.3 Mode of Transmission and Distribution 35
3.2 More Complicated Issues 39
3.2.1 Overhead Lines 40

3.2.2 Underground Cables ... 40
3.2.3 Substations and Distribution Systems ... 41
3.2.4 High Voltage DC Transmission ... 41
3.3 Expectation ... 41
Review Questions ... 43

CHAPTER 4 Electrical Characteristics, Modelling and Performance of Aerial Transmission Lines ... 44–120

4.1 Inductance of Aerial Lines ... 46
4.1.1 Fundamentals of Steady Magnetic Field ... 46
4.1.2 Magnetic Field of a Long Straight Conductor ... 48
4.1.3 Magnetic Field in a Group of Parallel Cylindrical Conductors ... 51
4.1.4 Inductance of Single-phase and Three-phase Lines ... 52
4.1.5 Concepts of Geometric Mean Distances ... 59
4.1.6 Bundled Conductors and Computation of Inductance ... 61
4.1.7 Computation of Inductance of Double-circuit Three-phase Lines ... 64
4.2 Capacitance of Aerial Lines ... 67
4.2.1 Fundamentals of Electric Field ... 67
4.2.2 Potential Difference between Two Points External to a Long Straight Isolated Conductor with Uniformly Distributed Charge ... 69
4.2.3 Potential Difference between Two Points due to Multiple Conductors ... 70
4.2.4 Capacitance of Single-phase and Three-phase Systems ... 71
4.2.5 Computation of Capacitance Using Geometric Mean Distances ... 74
4.2.6 Influence of Earth on Conductor Capacitance ... 77
4.3 Resistance ... 81
4.3.1 Shunt Conductance ... 82
4.4 An Exact Mathematical Model ... 83
4.4.1 Equivalent Circuit Model ... 88
4.4.2 Some Important Concepts ... 92
4.4.3 ABCD Constants of 'Electrically Short Lines' ... 96
4.4.4 Interpretation of the General Circuit Constants ABCD ... 97
4.4.5 Two Four-Terminal Networks in Cascade ... 97
4.5 Efficiency ... 99
4.6 Regulation ... 100
4.7 Some Important Observations ... 104
4.8 Power Equations and Line Compensation ... 107
Review Questions ... 117

CHAPTER 5 Overhead Line Construction ... 121–177

5.1 Route Selection ... 121
5.2 Line Supports ... 122
5.3 Sag and Clearance ... 127

5.4 Sag–Tension Relation 129
5.4.1 Effect of Wind and Ice Covering on Sag Calculation 135
5.5 Stringing of Transmission Lines 139
5.6 Location of Tower Structures 144
5.6.1 Span 144
5.6.2 Tower Spotting 144
5.7 Vibration of Conductors 145
5.8 Ground Wires 146
5.9 Insulators for Overhead Lines 146
5.9.1 Fundamentals of Insulation Breakdown 147
5.9.2 Materials 148
5.9.3 Types 149
5.10 Voltage Distribution Across a Suspension Insulator String 155
5.10.1 String Efficiency 158
5.10.2 Arcing Shield and Rings 158
5.10.3 Number of Disc Units in a String 159
5.10.4 Methods of Improving Voltage Distribution Across Insulator Strings 164
5.11 Electrical Tests on Line Insulations 166
5.11.1 Terms Used in Standards 166
5.11.2 High Voltage Tests on Line Insulators 167
5.12 Corona 169
5.12.1 Mechanism of Corona Power Loss in Air 171
Review Questions 175

CHAPTER 6 Underground Cables 178–207

6.1 Cable Components 178
6.1.1 Conductor 180
6.1.2 Insulating Material 181
6.1.3 Shields 183
6.1.4 Sheath, Jacket and Armour 183
6.2 Types of Power Cables and Constructional Features 184
6.3 Electrical Characteristics of Cables 186
6.3.1 Insulation Resistance of a Single-core Cable 186
6.3.2 Conductor Inductance 187
6.3.3 Cable Capacitance 188
6.3.4 Electric Stresses in Single-core Cables 192
6.3.5 Dielectric Losses and Loss Tangent of a Cable 197
6.3.6 Sheath and Armour Losses 199
6.4 Computation of Ampacity of Cables 199
6.5 Laying of Cables 201
6.6 Electrical Breakdown of Cables 202
6.7 DC Cables 204
Review Questions 205

CHAPTER 7 Substation and Distribution System 208–251

7.1 Substation 209
7.1.1 Types of Substations 210
7.1.2 Location of a Substation 211
7.1.3 Substation Equipments and Accessories 211
7.2 Layout of Substation 216
7.2.1 Bus Arrangements 216
7.2.2 Earthing 221
7.3 Distribution Systems 224
7.3.1 Primary Distribution System Arrangements 225
7.3.2 Primary Feeder Conductor Size 225
7.3.3 Secondary Distribution System Arrangements 230
7.3.4 Distributor Design 231
7.4 Transmission and Distribution Losses 241
7.4.1 Reasons for High Technical Losses 242
7.4.2 Application of Capacitors to Distribution System 242
Review Questions 250

PART II POWER SYSTEM OPERATION

CHAPTER 8 Elements of Electric Power Generation 255–299

8.1 Basic Methods of Production of Electrical Energy 256
8.2 Conventional Methods of Electric Power Generation 256
8.3 Steam Power Stations 256
8.3.1 Main Components of a Steam Power Station 257
8.4 Hydro-electric Stations 261
8.4.1 Water Storage 261
8.4.2 Schematic Layout of a Hydro-electric Station 263
8.4.3 Pumped-Storage Plants 265
8.5 Nuclear Power Station 267
8.5.1 Principles of Atomic Physics Revisited 268
8.5.2 Components of a Nuclear Reactor 270
8.5.3 Some Common Reactor Types 272
8.5.4 Disposal of Nuclear Waste 272
8.5.5 Indian Nuclear Power Plants 273
8.6 Gas Turbine Plants 273
8.7 Salient Characteristics of Various Types of Power Plants 276
8.7.1 Cogeneration 276
8.7.2 Distribution Power Generation 279
8.8 Synchronous Generator Revisited 280
8.8.1 Basic Principles 281
8.8.2 Circuit Model for a Cylindrical Rotor Synchronous Generator 282
8.8.3 Concept of an Infinite Bus 286
8.8.4 Power Control of a Finite Machine Connected to an Infinite Bus 287

8.8.5 Salient Pole Synchronous Generator 295
8.8.6 Operational Constraints of a Synchronous Generator Connected to a Large Network 296
Review Questions 298

CHAPTER 9 Load Flow Studies 300–334

9.1 An Illustrative Two-bus System 300
9.2 Load Flow Problem 307
9.3 Power Flow Equations 307
9.3.1 System Variables 311
9.3.2 Classification of Buses 311
9.4 Gauss–Seidel Iterative Technique Applied to Solution of Power Flow Equations ... 313
9.4.1 Computational Strategy 314
9.5 Newton–Raphson Algorithm for Solution of PFE 321
9.5.1 Elements of the Jacobian Matrix 324
9.5.2 Computational Steps for Solving PFEs by N–R Method 326
9.5.3 Sparsity Features 329
9.6 Fast Decoupled Technique 329
9.7 Representation of Tap Changing Transformer 331
Review Questions 333

CHAPTER 10 Power System Economics 335–372

10.1 Characteristics and Classification of Consumers 336
10.1.1 Diversity and Its Impact 338
10.2 Tariff Structure 340
10.2.1 Cost of Electrical Energy 341
10.2.2 Two-part Tariff 341
10.3 Operational Strategy to Meet Load Demand 344
10.4 Optimum Scheduling of Generators 347
10.4.1 Economics of Steam Plants 348
10.4.2 Optimum Scheduling for a Lossless System 349
10.4.3 Optimal Scheduling Considering Transmission Losses 353
10.4.4 Unit Commitment 361
10.5 Hydro-thermal Co-ordination 366
10.6 Short-term Load Forecasting (STLF) 369
Review Questions 370

PART III POWER SYSTEM TRANSIENTS AND PROTECTION

CHAPTER 11 Introduction to Power System Transients 375–378

11.1 Basic Concepts of Transients 375
11.2 Classification of Power System Transients 376
11.3 Concepts of Protection 378

Electrical Power Systems: Concept,Theory And Practice
