## FOREWORD

I will be very honest and to the point in explaining the purpose of publishing this book.

The objective clearly is to make a genius out of an ordinary child. Indeed, it is a long-term investment plan. Now, you might want to stop reading further and think it is yet another book on the racks that is just trying to earn revenues. However, it is not that. This book has a very interesting revenue-generation model. This book is a very long-term investment and the profits through it will accrue not if you buy this book, but actually abide by at least 10 per cent of its content. Our revenue will come in the form of happier and successful individuals, motivated and aspiring youth, fewer frustrations, healthy relationships, and a flourishing culture, honest and responsible citizenry... In all, a better place to live in and, of course, a better place to do business in.

Hence, this book is just a humble effort by our team to do our bit for the future generations and for the society as a whole.

All of us have portions of the good, the bad, and the ugly somewhere within us, and sometimes we all get

confused about which part of us should become our personality and which part of it should decide the course of our lives. This book discusses all such elements that may bring about a change in our think-believe patterns and also guides us on keeping the good alive within us and confronting the bad and the ugly.

It is about really identifying yourself or your pupil. It is about, as Gandhi said, being the change that we want to see in the world. It is about being.

I would not have been able to write or express the concept myself had I not implemented the principles contained in the book on my own daughter who was just an average student. I have not written anything out-of-the-box. There is no saintly advice or overflowing gyaan. The book is simple assemblage, in simple conversational tone, of what the greats have said, what the greats have done, and what can one do to be the great himself. It is about finding a genius within your child. It is about helping her to perform to the fullest possible potential.

7. U of a Genius - Undeterred	137
8. S of a Genius - Social	163
9. Genius stays grounded, always	185

## PREFACE

India is a land of diverse cultures, religions and has a hoary past. From times immemorial Indians have been storehouses of knowledge. Before the British came to India universities such as Taxila and Nalanda attracted even foreigners. Swami Vivekananda's speech in the parliament of religions at Chicago enthralls us even today. Then where did we go wrong? No where. The circumstances were not conducive. But today, the Time is ripe. India is slated to be the next global superpower. The economy is booming. The GDP is soaring. Against such a background we want our own children to explode into the world that beckons them. We want to give them weapons today so that they can take the world by storm tomorrow.

Education has always been a priority with us in India. It will help us to polish or smoothen out the rough edges and lend a sparkle to their potential. Our world has changed for the better. It is a world which runs on the wheels of ideas; where knowledge is power. In such a scenario India stands supreme.

Earlier the developed countries required fuel (crude oil) for growth, which was provided by the Middle East Countries making them rich overnight. Today the fuel required is knowledge based skilled manpower. This fuel shall be provided by us-INDIA.

It sounds like a dream - an impossible ideal. True! it is a dream. But this dream is rooted in reality. It is estimated that nearly 3 million jobs will be generated in the IT or IT-enabled sections alone by the year 2020. It is not only the job sector that beckons to them. They can make their presence felt in any given field of their choice. Today the environment is so conducive that people are able to make full-fledged professions out of their hobbies or passion in life.

With the help of the tools provided in this book we can tap the hidden potential in our children so that we can make geniuses out of them. Thus creating an India which is fearless, powerful and knowledgeable with equal opportunities for all.

## **Acknowledgements**

Any task requires effort from many people and this book is no different. We would like to thank the entire AIETS team led by our Deepak Agarwal (working as director and handling knowledge base content at AIETS) whose effort made this publication possible.

Many examples, stories have been collected from different sources like newspapers, magazines, seminars over last couple of years. Unfortunately, sources were not always noted or available; hence, it becomes difficult and impossible to provide accurate acknowledgement.

Regardless of the source we wish to express our gratitude to those who may have helped us directly or indirectly in writing this book

We would like to express special thanks to-

- To our esteemed teachers, academicians and students whose feedback inspired us to write this book.
- Our Directors Avinash Agarwal and Rupesh Agarwal for their moral support and encouragement during the making of this book.
- To Mrs. Meena Iyer for her inputs, language and revision of the work.
- To Ms. Ritu Anand for layout and graphic designing.
- To Johar Haider for assistance in graphic designing.

Every effort has been made to give credit where it is due for the material contained. If inadvertently we have omitted giving credit, future publications will give due credit to those that are brought to our attention.

# Chapter 1

## Do you know a genius?

*Great men are meteors that burn so that the earth may be lighted.*

*~ Napoleon Bonaparte*

### **Who's a genius?**

The best answer to this query lies in yet another question: Am I a genius? Or have I ever tried to be one?

Imagine everybody in the world answering this query honestly and taking account of all the efforts they have made for the betterment of their lives, for the achievement of their
